## PALMTF1308 Palletizer

The PALMTF1308 palletizer is noted for its great robustness, reduced dimensions, a very easy to use interface, and a large variety of working formats.

The touchscreen and the integrated software let you to create new formats, change the existing ones, and adjust production times without stopping the palletizer work.

The PLC has inputs and outputs for automatic connection to manual packing tables or place packer machines.

You can add some optional elements to improve its versatility:

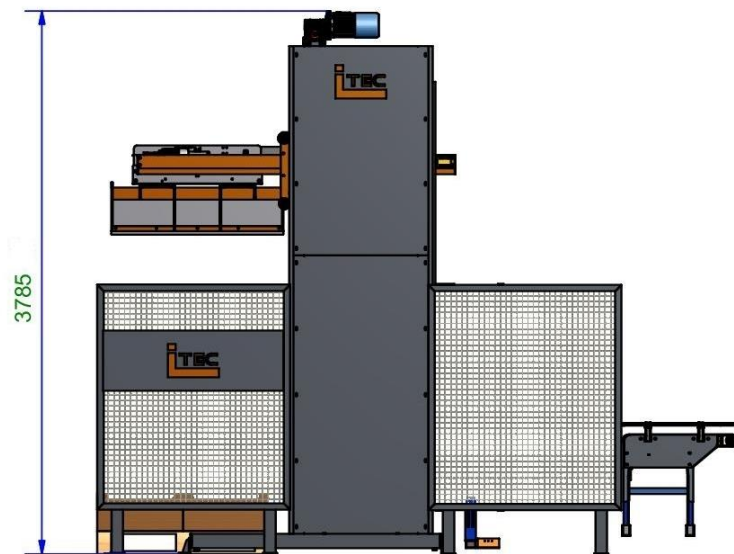

**Rotator at the table entrance:** If you have a barcode traceability system, the palletizer can rotate the boxes so the barcode is always at the visible side of the pallet.

**Mobile separator:** Allows you to work with more dynamic formats and let you to position the pallet always at the same place for different formats.

**Automatic tied:** It provides more stability to the boxes when the worker is going to pull out the pallet.

Posibility under request of automating the movimenting pallets process and empty pallets stacking.

## Technical Data

Production	2,5 layers / Min
Power	4 KW
Max. Charge	200 kg / capa
Air consumption	100 LN/Min
